Wan2.2 test result

add adaCache

```

1 height: 256
2 width: 416
3 num_frames: 45
4 num_inference_steps: 50

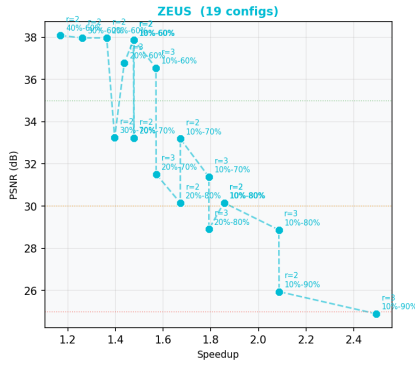

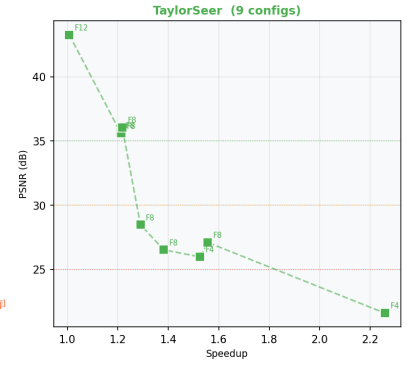

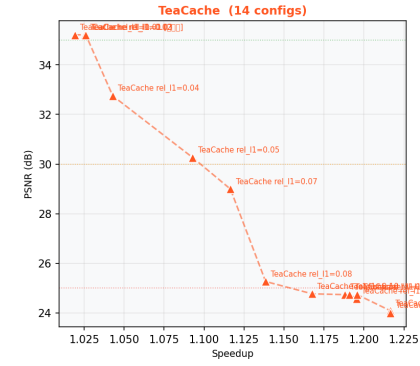

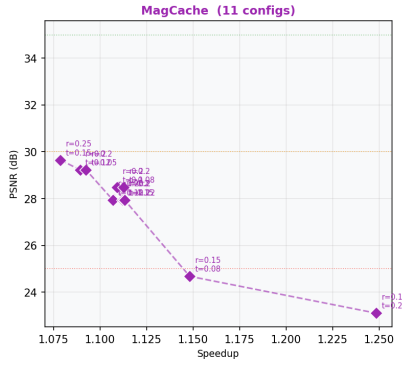

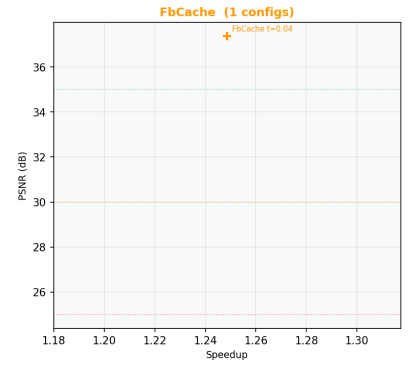

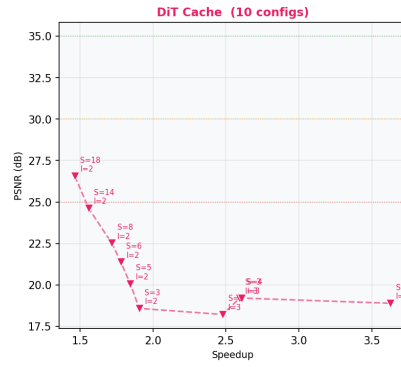

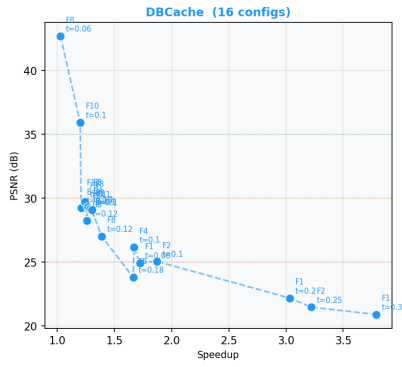

```

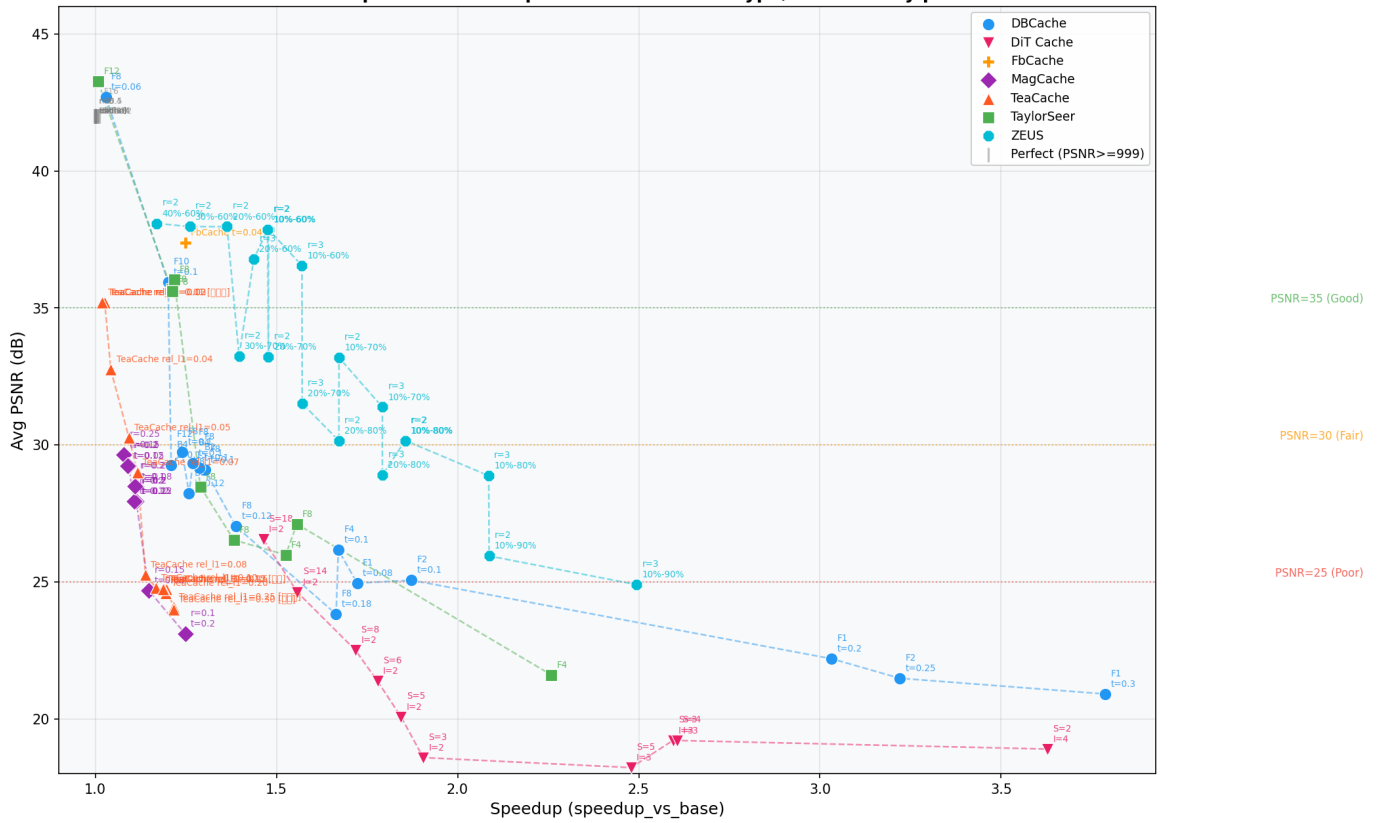

480p frame:45 step:50 add zeus、Dit

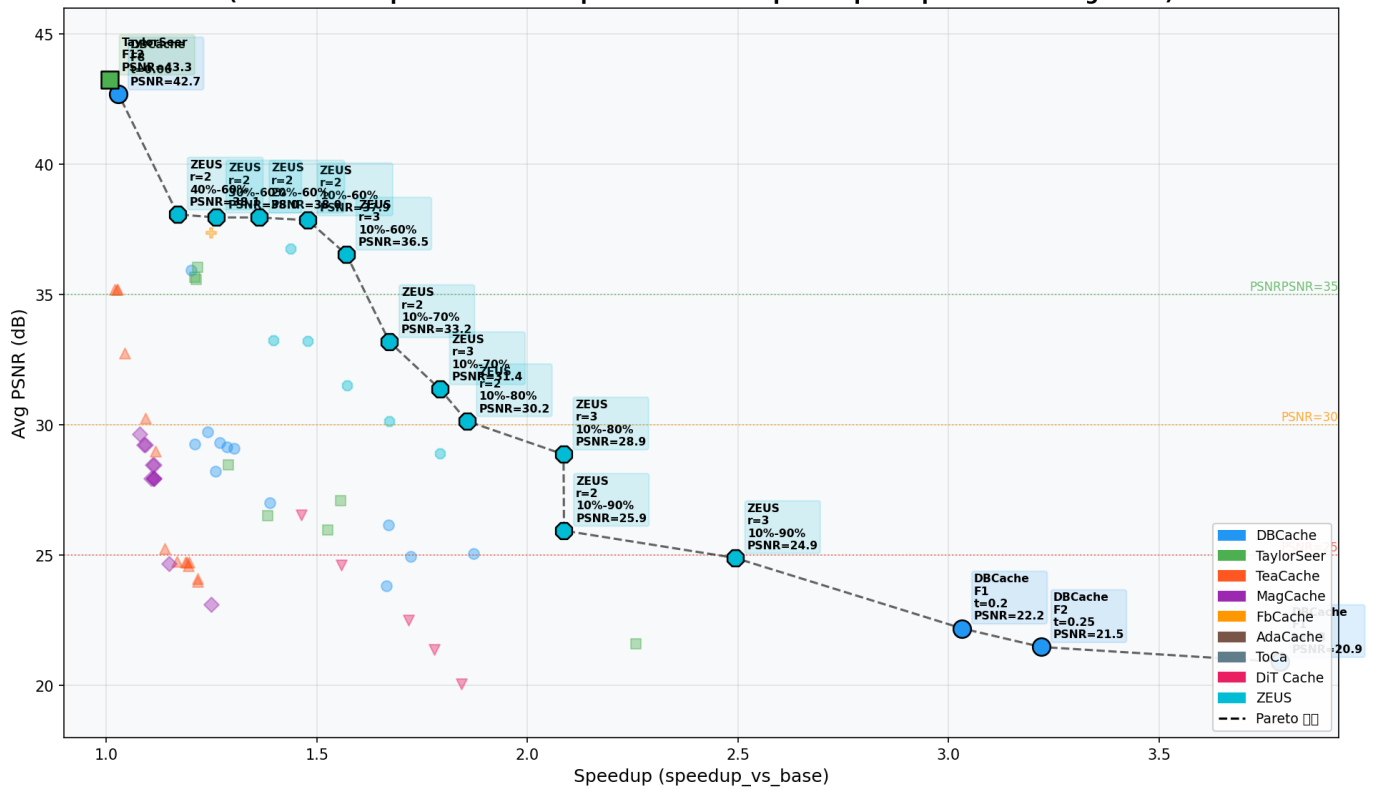

Cache Type Parameter Sweep: PSNR vs Speedup
(each point = one config; line connects configs of same type ordered by speedup)

Cache Scheme PSNR vs Speedup (adp_1 + adp_2 + adp_3 + adp_4)
Dashed line = parameter sweep within same cache type; labels = key params

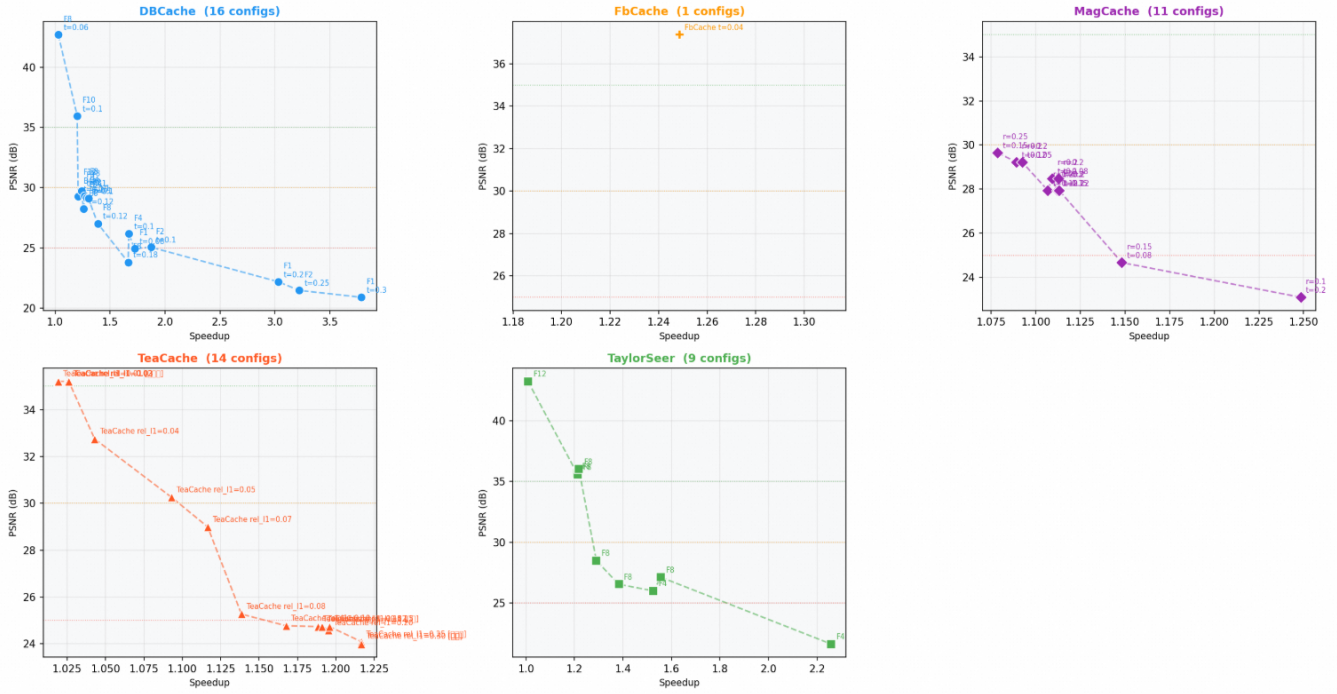

Cache Scheme Pareto Frontier
(bold-outlined points = Pareto optimal: cannot improve speedup without losing PSNR)
